Experience

Full Stack Project: Due Gatti - Café & Gelato

 [Source Code](#)  nov/20 ~ feb/21

- Built an e-commerce website for a well-known neighbourhood in Porto Alegre.
- Back-end developed in Django (Python), front-end designed in Bulma (CSS) and VueJS (Javascript).
- Stock logic, receipts automatically generated in a PDF file and communication between product and product variant were great challenges that helped the learning process.
- Deployment in PythonAnyWhere. (duegatti.pythonanywhere.com)
- Development of a management panel. (duegatti.pythonanywhere.com/dashboard)

Full Stack Project: Anaden Tracker

 [Source Code](#)  jun/20 ~ oct/20

- Built an website for the game: *Another Eden: The Cat Beyond Time and Space*.
- Back-end developed in Django (Python), front-end designed in Bootstrap (CSS) e JQuery (Javascript).
- The project was accomplished with the implementation of the DataTables plugin with API calls made by JQuery AJAX. With this integration, the performance was greatly improved.
- Deployment in PythonAnywhere. (anadentracker.pythonanywhere.com)
